ARMY RULE

Reanimation Protocols: End of your Command phase, every eligible unit on the battlefield reanimates D3 wounds. Heal wounded models first; if all survivors are full and the unit is below Starting Strength, return destroyed models one wound at a time. Stop at full strength.
Reanimator aura adds D3. Warriors re-roll the main die. These apply when Undying Legions activates the protocols.

DETACHMENT RULEAWAKENED DYNASTY

Command Protocols: While a Necrons Character model is leading this unit, add 1 to Hit rolls for attacks made by models in that unit.
Applied to every non-Torrent weapon in both attached-unit cards on page 1. A red asterisk marks the adjusted Hit value: 3+ is base 4+ improved to 3+; 2+ is base 3+ improved to 2+. Imotekh's base 2+ remains 2+, with the +1 available to offset a penalty.

ENHANCEMENT IN LIST20 PTS

Nether-realm Casket: Necrons model only. While the bearer is attached to a unit, models in that unit have Stealth.
