GRAND COVEN STRATAGEMS

- **DESTINED BY FATE - 1CP, any phase:** After a save fails for a TS **Psychic** model, change that attack's Damage to 0.
- **ARCANE FOCUS - 1CP, Shooting:** After a Channelled **Psychic** test, re-roll every D6 in that test.
- **DEVASTATING SORCERY - 2CP, Shooting:** One TS **Psychic** unit not yet selected to shoot: **Psychic** weapons get +9" range and full Hit/Wound re-rolls for the phase.
- **PSYCHIC DOMINION - 1CP, any phase:** After enemy selects targets: its **Psychic** weapons gain Hazardous; targeted TS unit gets FNP 4+ vs **Psychic** Attacks.
- **EGOTISTICAL POWER - 1CP, MY Command:** One TS **Psychic** unit gets a selected Kindred Sorcery ability instead of army choice until MY next Command; may reuse a spent choice.
- **DESECRATION OF WORLDS - 1CP, MY Command:** One TS **Psychic** unit on an objective you control makes it sticky.

ATTACHED-UNIT INTERACTIONS

- **Psychic buffs:** weapon attacks only; no +range, +wound or +Damage to Rituals.
- **Buffs end with their source:** leader must be leading for Lethals/Ilusions; Rubric re-rolls end when bodyguard dies; Icon ends when its bearer dies.
- **GRENADES:** only foot/Disc Sorcerer models have it here. Their attached units qualify; measure Explosives from the Sorcerer, not bodyguards.

OPPONENT'S SHOOTING PHASE

- **Start - Magnus:** if Treason chosen, enemy within 24": ranged weapons Hazardous this phase.

END OF OPPONENT'S TURN

- **Tzaangors:** >6" from all enemies: may enter Strategic Reserves.

Plan: Magnus starts in reserve; the rest of the army scores and keeps options open. These are suggested staging areas on the three GDM mirror maps, not exact model footprints or guaranteed hiding spots. You are **blue/Defender**; rotate the plan 180° for the other side. Confirm your event uses these layouts.

MAGNUS: YES TO RESERVE, NO TO AN AUTOMATICALLY SAFE DROP

Start in reserve to avoid turn-one shooting/charges. His Deep Strike allows arrival in your turn two, **more than 8" horizontally from all enemies**, including in their deployment zone. Fit his whole base legally; arrive by the end of round three. Initial reserves are capped at half your army's points limit. [1, 2]

Recommendation: start the Terminator unit on the table, hidden, with Crystal available. On turn two choose Magnus's landing only after checking every Knight's next movement and charge routes, firing lanes, screening and your own support. A far flank is an option, not a promise of safety. **Magnus's gold marker is a future candidate, not a deployed model.**

01 / SWEEPING ENGAGEMENT

- **Stage:** main damage package in the lower blue pocket. Keep upper flank cheap; do not feed it Rubrics piecemeal.
- **Score:** send a small unit toward the lower-left expansion when the route is safe.
- **T2:** consider the lower lane if the Lancer commits high; check the Paladin and Valiant too.

Read the maps: compact labels mark staging areas, not model footprints. "+ sorc" shows an attached character; spear disc and bow disc distinguish the two Enlightened units. **Red:** enemy Knights. **Gold:** possible turn-two Magnus arrival, not an initial deployment.

02 / CRUCIBLE OF BATTLE

- **Stage:** use the bottom-right depth; avoid lining up on the diagonal edge.
- **Score:** expansion first; retain a second small unit for centre if Knights leave it open.
- **T2:** right-side arrival may support the brick if the Lancer pushes left. Check cross-board guns.

03 / TIPPING POINT

- **Stage:** brick and Prince in the lower-right pocket; mobile scorers cover the lower-left route.
- **Score:** do not funnel every unit through the middle to chase one Knight.
- **T2:** Magnus's right-side arrival only if vacated and defensible; otherwise use your own backfield.

FIRST TWO TURNS / PLAY THE MISSION

- **Deployment:** hide valuable units from likely Knight firing positions, not only their starting positions. Keep a fallback pocket for Magnus; do not rely on a single thin infantry screen.
- **Your T1:** use cheap units for expansion/centre only when they can survive or earn enough VP. Keep the brick relevant while Magnus is absent; resist spending Crystal without a useful destination.
- **Sabotage:** action in your Shooting phase, one eligible unit per different non-home objective. Finish at turn end controlling it: 3VP, +2 if in enemy territory. From round two, holding a non-home objective scores 4VP at Command end (turn end in round five). [3]
- **Your T2:** land Magnus to combine damage into one exposed Knight while preserving the next turn. If you go second, assess after their T2, not after their T1. Do not assume he kills his target.

KNIGHT TRAPS / CHECK BEFORE PLACING MAGNUS

- **Lancer:** M14", dangerous melee and free Crushing Impact. Check the actual detachment/enhancements for advance-and-charge and movement bonuses; don't assume a fixed threat circle. [4]
- **Screens:** Super-heavy Walker can cross non-Titanic models on normal/advance/fall-back moves. A thin line is not a wall. Check legal landing space beyond it. [1]
- **Your Disc cannot slow a Knight:** Binding Tendrils targets INFANTRY. Use the bows' reactive move for positioning, not as guaranteed escape. [5]
- **Your Prince:** these big Knight CHARACTER targets give RR1 Hit/Wound, not full re-rolls unless also PSYKER. The Terminator Sorcerer's Anti-Vehicle 4+ / Devs is relevant. [5]
- **Rapid Ingress is not the default:** it exposes Magnus during their turn. Use only after checking both remaining shooting and charges.

Listhammer baseline: Nathaniel Borge, Lone Star Open, 5-1: Castellán, Crusader, Errant, Paladin, Valiant; five big Knights, no Armigers/allies, Priority Assets. This verified list has **no Lancer**: the diagrams replace the Errant with a hypothetical Lancer for your matchup, not as a claim about that roster or a points-checked army. [6]
